

## **TEC 112 ASSIGNMENT 2**

Following the laboratory experiments carried out in the course of the semester, briefly give a summary of not more than one page outlining the following:

1. What branch of chemistry each of the experiments belongs to
2. What topic of study each of the experiments relates to and an explanation of which aspects of the topic were covered.
3. Challenges encountered during the experiments and how you handled them.

### **Note:**

The assignment should be hand written and submitted to the respective class representatives.

This should be done by **4<sup>th</sup> July 2025**
